

Nordstrom Valves

Introducing the new **Super Nordstrom® Regular Pattern Iron Plug Valve**

Sizes available: Figure 114 threaded end valves - Nominal pipe sizes
1/2-2 and 3 (DN 15-50 and 80)
Figure 115 flanged end valves - Nominal pipe sizes
1-4 (DN 25-100)

Pressure rating: 200 CWP (13.8 bar)

Temperature range: -20°F to 350°F (-29°C to 177°C)

Integral Stop and Locking Device –
Same reliable and easy-to-use
design as two-bolt cover valves.

Redesigned Cover – Eliminates
debris trap around stem that can
retain moisture and cause corrosion.

Actuator Mounting Pads – Allows
for convenient field attachment of
operator/actuator mounting
brackets thus eliminating the need
for expensive saddle-type brackets
or violating the integrity of the
cover bolts.

Balance Spring – Mechanically
balanced providing lower and
predictable operating torques.

**Side-Mounted Sealant Injection
Fitting** – Improved sealant
injection system allowing sealant
injection under plug for effective
plug jacking.

Upper dimensions and weights are given in inches and pounds.
Lower dimensions and weights are given in millimeters and kilograms.

Nominal Valve Size	NPS DN	1/2 15	3/4 20	1 25	1-1/2 40	2 50	2-1/2 65	3 80	4 100

Flowserve Corporation has established industry leadership in the design and manufacture of its products. When properly selected, this Flowserve product is designed to perform its intended function safely during its useful life. However, the purchaser or user of Flowserve products should be aware that Flowserve products might be used in numerous applications under a wide variety of industrial service conditions. Although Flowserve can (and often does) provide general guidelines, it cannot provide specific data and warnings for all possible applications. The purchaser/user must therefore assume the ultimate responsibility for the proper sizing and selection, installation, operation, and maintenance of Flowserve products. The purchaser/user should read and understand the Installation Operation Maintenance (IOM) instructions included with the product, and train its employees and contractors in the safe use of Flowserve products in connection with the specific application.

While the information and specifications contained in this literature are believed to be accurate, they are supplied for informative purposes only and should not be considered certified or as a guarantee of satisfactory results by reliance thereon. Nothing contained herein is to be construed as a warranty or guarantee, express or implied, regarding any matter with respect to this product. Because Flowserve is continually improving and upgrading its product design, the specifications, dimensions and information contained herein are subject to change without notice. Should any question arise concerning these provisions, the purchaser/user should contact Flowserve Corporation at any one of its worldwide operations or offices.
