

# MULTI-PORT SANITARY VALVES

## 3-WAY SANITARY VALVES

**THE ULTIMATE IN  
AUTOMATION TECHNOLOGY!!!**

### FEATURES / SPECIFICATIONS:

- Tru-Flo Multi-Port Tri-Clamp Sanitary Ball Valves are supplied in Standard and Encapsulated (Cavity Filled) designs.
- Multi-Port Valves provide a positive seal at every port.
- Direct Mounting ISO5211 Pad facilitates easy automation and installation in space restrictive applications.
- Spring loaded washers create a live loaded, self-adjusting stem assembly reducing in-line maintenance costs
- Ideally suited for high cycle applications in either manual or automated conditions
- Multi-Port Valves reduce costs and simplify flow control enabling shutoff and directional control with a single valve
- 316 Stainless Steel
- Full-Port design in 8-12 Ra finish
- When equipped with Encapsulated (Cavity Filled) Seats, Tru-Flo Multi-Port Sanitary Ball Valves meet or exceed USDA and FDA standards in federally inspected facilities
- Options: Tri-Clamp or Butt-Weld  
Standard and Encapsulated (Cavity Filled) Styles  
L-Port or T-Port configuration  
Sizes 1"-4"

Item	Part name	Material
1	body	CF8M
2	end caps	CF8M
3	seat	PTFE
4	ball	SUS 316
5	stem	SUS 316
6	joint gasket	PTFE
7	gasket	PTFE
8	seal	PTFE
9	gland ring	SUS 304
10	o ring	VITON
11	belleville spring washer	SUS 301
12	lever nut	SUS 304
13	locking tab	SUS 304
14	handle	SUS 304
15	plastic coating	PVC
16	stop screw	SUS 304
17	bolts	SUS 304
18	static device	SUS 316
19	spring	SUS 316
