Hydrometers

Description

Winters' Hydrometers are designed to measure the percentage of alcohol content for spirits or beer. Winters Alcohol Hydrometers are manufactured in accordance with guidelines set by Revenue Canada and are certifiable by Revenue Canada Customs and Excise.

Specifications			
Case:	Soda Glass		
Bulb:	Shot poised, sealed with specially		
	formulated wax		
Maximum Temperature:	+176°F (+80°C)		
Minimum Temperature:	+32°F (0°C)

Hydrometers

ALCOHOL HYDROMETERS

Used to measure the alcoholic strengths/contents of spirits, based on the percentage of alcohol by volume at 20° Celsius.

The Alcohol Hydrometer has an overall length of 300mm with a 38mm bulb and a 4mm stem, all manufactured of glass. The scale is white paper with black graduations and figures with graduations every 0.2 kg/m3. Accuracy is +/-0.2 of full scale.

SUGAR HYDROMETERS

Brix Scale - temperature calibration 20º Celsius.

BREWERY SACCHAROMETERS

(Balling) percent sugar by weight (Plato scale) combined form with built in thermometer, standardized at 14 Reaumur, with temperature correction table for brew house and laboratory.

ALCOHOL THERMOMETER

250mm mercury filled glass thermometer with scale range $-25/+45^{\circ}$ Celsius engraved on stem. Subdivided every 0.5° Celsius. Calibrated for total immersion with glass ring top for suspension in trial jar. Maximum allowable error $+/-0.3^{\circ}$ Celsius.
