HP45 Bimetallic Steam Trap

Description

Spirax Sarco's HP45 bimetallic steam traps are made of forged steel, and designed for draining high pressure, high temperature steam lines and processes.

These steam traps, which are specially designed for HP steam, have a reinforced stainless steel insert within the body and can be repaired inline. They operate with no loss of steam, and quicky drain air, non-condensable gases and large quantities of cold water on start-up.

Normally open in the event of failure, they have a check valve, a built-in strainer screen and an external device for adjusting the discharge temperature of the condensate.

Sizes and pipe connections

1/2", to 1" screwed BSP/NPT and socket weld ends (ANSI B 16.11) 3/4" and 1" with ANSI 600 flanges

Limiting Conditions

Body design conditions	PN150, C	lass 900 to AN	SI B 16.34	
PMO - Maximum operating pressure		652 psig	45 barg	
TMO - Maximum operating temperature		842°F	450°C	
Minimum operating pressure		217 psig	15 barg	
ΔPMX - The back pressure for correct operation must not exceed				
90% of the upstream pro	essure.			

Designed for maximum cold hydraulic test pressure of 3320 psig 229 barg

Materials

Installation and maintenance

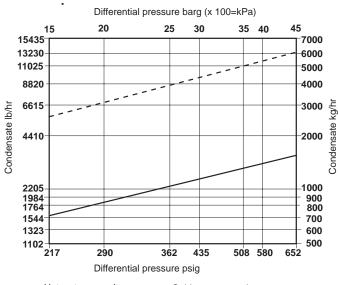

Full Installation and Maintenance Instructions (Inclusive of operation and fault finding) are supplied with the product, see IMI

How to order

Example: 1 off 1/2" Spirax Sarco 'BYVAP' HP45 bimetallic steam trap with socket weld end connections.

Capacities

Hot water capacity -- Cold water capacity - - - - -

Spare Parts

The spare parts available are detailed below. No other parts are supplied as spares.

Available spare

Bimetallic assembly kit 2, 3, 4, 5, 8

How to order spares

Always order spares by using the description given in the column headed 'Available spare' and state the size and model of the bimetallic steam trap.

Example: 1 — Bimetallic assembly kit for a 1" Spirax Sarco 'BYVAP' HP45 bimetallic steam trap.
